## 37mm ARWEN<sup>®</sup> Less Lethal Impact Baton 37mm ARWEN<sup>®</sup> AR-3-CS-VALVE How it works

The 37mm ARWEN<sup>®</sup> AR-3-CS-VALVE Impact Baton with its micronized powder payload is designed to disperse its CS powder payload upon impact. The proprietary design of the AR-3-CS-VALVE cap is specifically designed to expel the CS powder payload to the rear of the Baton through each of the eight "Valves". This results in a very effective "cloud" being dispersed. The valves are designed to disperse the powder payload in a radial and rearward pattern. The proprietary design of the "Valves" reduces the chance of the payload dispersion cloud being trapped by the targets clothing.

Other AR-3-VALVE variants available with Inert, OC or CN powder payloads. All 37mm ARWEN<sup>®</sup> AR-3-VALVE Impact Baton Caps are color coded for rapid identification of the type of Payload contained within the "Valve" Cap.
